EXP:3

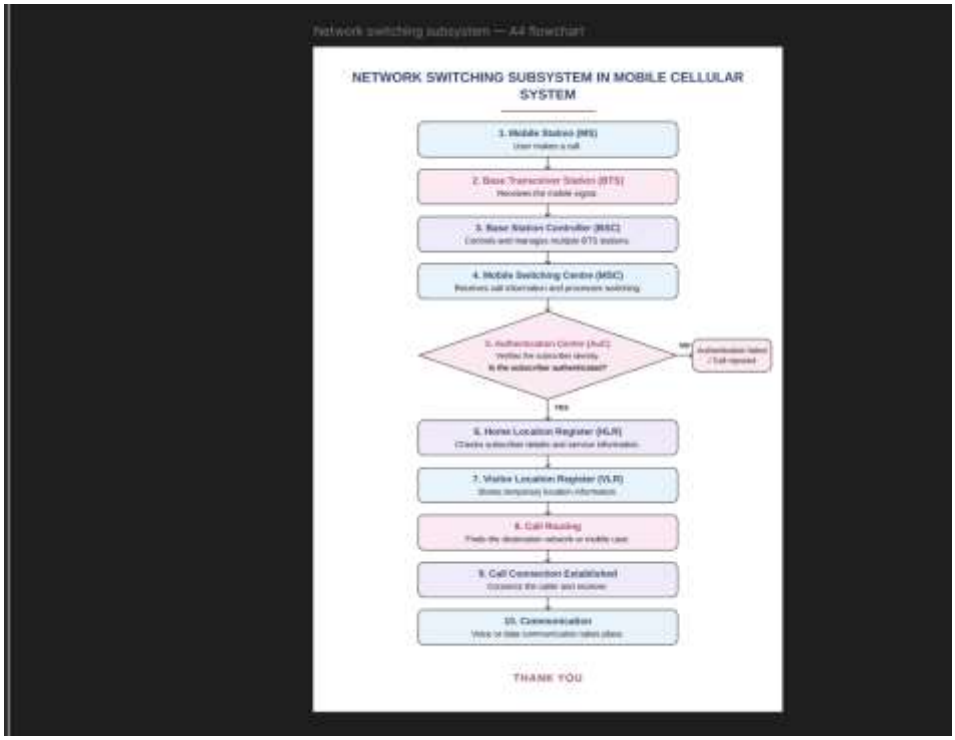

Develop a flowchart in Figma depicting the operation of a Network Switching Subsystem in a mobile cellular system.

Aim:

To develop a flowchart in Figma depicting the operation of a Network Switching Subsystem (NSS) in a mobile cellular system.

Algorithm:

1. Open Figma and create a new design file.
2. Select an A4 portrait frame.
3. Add the title Network Switching Subsystem in Mobile Cellular System.
4. Create flowchart shapes using rectangles and diamond shapes.
5. Add the Mobile Station (MS) as the starting point.
6. Connect BTS and BSC to show signal transmission.
7. Add MSC to manage call switching.
8. Include AuC, HLR and VLR to verify subscribers and retrieve location details.
9. Add call routing and call connection steps.
10. Connect all the shapes using arrows and apply suitable colours.
11. Review the flowchart and save the design.

Result:

Thus, the flowchart depicting the operation of the Network Switching Subsystem in a mobile cellular system was successfully designed using Figma.
